

TOBACCO USE IN BLACK WOMEN

Smoking causes 20% of all cancers and nearly 30% of cancer deaths^[1]

Smoking increases the risk of breast cancer in both premenopausal and postmenopausal women^[3]

Smoking causes 80% of lung cancer deaths in U.S. women annually and the second most common cancer in African American women^[4,7]

The Tobacco Industry has a history of aggressively targeting women^[5]

Women who smoke may develop severe COPD at a younger age^[6]

Quitting smoking has health benefits like lowering the risk of COPD, reducing the risk of multiple cancers, and so much more!^[2]

Visit AMPLIFY for cessation resources today!

California Tobacco Prevention Program, contract #22-10399
